

# SureBlue

ASK FOR THE  
BLUE LINER!

**SureBlue container-matched liners put and end to time-wasting bag tie-offs and messy liner cave-ins.** They not only provide important cost advantages, they're a great choice for environmental source reduction: Thinner, stronger HEXENE STRONG films handle heavier loads at less cost while reducing plastic waste by up to 35 percent. And by eliminating wasteful liner overhang, extra bag width and costly double bagging, less plastic waste ends up in landfills or incinerators.

**Where Service is First!**

PHILADELPHIA, PA

**HEXENE  
STRONG!**

## SERIES AT A GLANCE:

- No more guessing - the right size liner for every receptacle, every time.
- Eco-conscious Source Reduction - Up to 35% less waste entering landfills.
- Maximum strength for superior puncture and tear resistance.
- Coreless rolls for ease of use and storage.
